

# RAPID CLIPS

Welcome to the new age of fast fencing systems with the introduction of the Southern Wire Rapid Clip system which makes attaching wire onto steel posts a simple and painless process.

The unique Australian designed and made Rapid Clips are constructed from a heavy duty 4.00mm heavily galvanised wire and can be easily incorporated into any traditional farm fencing system where steel posts with holes are being used to secure barb, plain and prefabricated wires. The Rapid Clips take mere seconds to install in comparison to the manual tie or post clip methods which often involve time consuming and repetitive twisting actions and easily the least favourite job for any fencing team. Consider the Rapid Clip system for your next fencing project to experience the difference for yourself.

- Australian made and designed
- Heavy duty construction
- Fast and simple installation
- Makes a traditionally hard job look and feel easy.

**Locked In:** The Rapid Clip appears loose once in but the narrow hook over the line wire prevents from rotating and coming out of the post hole

| CODE                        | PRODUCT      | QUANTITY |
|-----------------------------|--------------|----------|
| <b>RAPID CLIPS - 4.00mm</b> |              |          |
| 8782                        | Pack of 250  | 250      |
| 8782                        | Pack of 1000 | 1000     |
