

FARM FENCE™

FarmFence™

Since its introduction to the market, Southern Wire FarmFence™ has become the fence of choice for farmers, station owners and fencing contractors, due to its exceptional value and performance.

Made from high quality, heavy galvanised wire, FarmFence™ uses the improved version of the old ring joint knot which minimises the risk of the vertical wire from slipping along the horizontal wire. The FarmFence™ also has a one piece vertical wire, giving the fence greater vertical stability. These two factors ensures FarmFence™ is both easy to strain and low maintenance, saving time and money. Also available with a 2.80mm top and bottom wire.

Southern Wire FarmFence™ provides:

- **Longevity** – Manufactured in Australia using high quality, heavy galvanised wire.
- **Strength** – FarmFence™ knot to minimise the risk of the vertical wire from slipping.
- **Stability** – Single picket wire to provide long-lasting vertical integrity.

7/90/30 – 7 line wires; 90cm fence height; 30cm between vertical wires

Testimonials - what the fencing contractors say...

"I am very impressed with our new fence to date. About 7km of new fence is up so far and it had a baptism of fire. I think we have upset 1000 years of kangaroo migration between feed and a lake we fenced off. They gave the fence a very hard time for the first 24 hours. The fencing contractor commented it is the best wire for joining rolls he has ever used."

Paul Martin, NSW

"We have noticed that the FarmFence strains up a lot easier than the other ring-joint type fences. We used to use only one brand of fence but the FarmFence absolutely kills it for straining up and ease of use. All the vertical wires are always perfectly straight up and down which means the finished fence looks so much neater than other fences on the market. The FarmFence really is a fantastic fence!"

Bill Guest, VIC

"FarmFence is a fantastic product. It is the first fence we have used that strains up perfectly. We have had issues with other types of fencing straining up unevenly which can be very time-consuming but never with the FarmFence. If I have the option I refuse to use anything else."
