

FASTLOCK[®]

VERMIN

Fastlock[®] Vermin

The Southern Wire Fastlock Vermin range is specially engineered to provide the easiest and most effective option for vermin exclusion fencing.

Developed in conjunction with landowners and government departments, Fastlock Vermin is constructed with one piece vertical wires and the strong Fastlock knot to ensure it will withstand pressure from the most determined of animals. It is also available in some sizes with a hinged footer section that is machine knotted to the base of the fence, offering a fully integrated barrier against kangaroos, wallabies, wombats and wild dogs.

Southern Wire Fastlock[®] Vermin provides:

- **Longevity** – Manufactured in Australia using high quality, heavy galvanised wire.
- **Strength** – Fastlock[®] knot to minimise the risk of the vertical wire from slipping.
- **Stability** – Single picket wire to provide long-lasting vertical integrity.
- **Protection** – Optional hinged footer to prevent vermin from pushing under the fence.

11/90/30 – 11 line wires; 90cm fence height; 30cm between vertical wires

The Fastlock® Vermin Premier50™ is an exceptionally high quality fencing product which provides you with the assurance that once erected your fence will be there working for you for many, many years.

The construction of the Fastlock® Vermin Premier50™ is the tried and proven Fastlock® knot with heavy duty 2.8mm wires at the top and bottom of the fence. Once

erected, your fence needs to be able to withstand the harshest elements for the longest time possible. This is where the Premier50™ coating will prove itself year after year. In many areas across Australia the Premier50™ coating would be expected to last in excess of 50 years. For further information regarding the unique Premier50™ coating please visit www.southernwire.com.au

...it lasts longer®
