

Southern Wire offers a full range of heavy galvanised plain wires to support our pre-fabricated fence range.

The **FlexiWire** and **StrongWire** are appropriate for most fence building requirements, with a range of other wires from 2.0mm to 4.0mm available for special projects.

Selected sizes of **Plainwire** is available in the unique **Reel Easy** 1500m coils. The **Reel Easy** coils have had exceptional take up across Australia as they largely eliminate tangles and dispensing issues that are common with the traditional rolls. They can be particularly useful when erecting multiple strands of **Plainwire** which is common in many areas across Australia.

REEL-EASY UNCOILER

The Reel-Easy Uncoiler makes running out fencing wire a dream. It is specially engineered to be used as a stationary un-winder (either positioned on the back of a vehicle or on the ground) or as a walk-along un-coiler.

The Reel-Easy plain wire is available in all the standard sizes and has to be tried to fully appreciate all the advantages it offers.

This concept has been extensively tried and tested throughout the United States and Europe and, Southern Wire, with its focus on development and innovation, is proud to have introduced Reel-Easy into Australia.
