

HORSEFENCE

Southern Wire is the original manufacturer of the revolutionary HORSEFENCE in Australia. Used extensively throughout horse studs and properties across North America and Europe, the Southern Wire Horsefence is renowned as the fence that offers ultimate security and protection for equine property.

HORSEFENCE is fast becoming an all purpose multi application fence due to its high tensile nature (trampoline effect) leaving both animals and the fence intact after impact, whilst maintaining a constant protective barrier against vermin. **HORSEFENCE** is quickly becoming the preferred choice of discerning equine property owners and managers.

Southern Wire HORSEFENCE provides:

- **Longevity** – Manufactured in Australia using high quality, heavy galvanised wire.
- **Safety** – Compact, smooth knot minimises possibility of injury.
- **Protection** – Crimped line wires absorb pressure and reduce injury risk.
- **Peace of Mind** – 5cm and 10cm spacing prevents horses becoming tangled in the fence.
